

A man wearing safety glasses, a light blue button-down shirt, and khaki pants is holding a chainsaw. He is wearing orange and black STIHL gloves. He is smiling and talking to a woman with a large afro hairstyle, wearing a white patterned shirt and dark pants. They are standing in a garden with pink flowers.

STIHL

YOUR SUMMER, MY SUMMER, BY STIHL

Most of us are just trying to get through winter, we wake up thinking, 'we're living for the summer.' Why? Because summer is when we're inspired. To try new things. To finally finish what we started. To reconnect. To recuperate.

We build out what we hope the summer will be in our heads...memories of what we experienced as kids, sensations... We're more satisfied with the days in summer, we're less fatigued in the summer, we feel the sun in the summer, we eat better in the summer.

Unbeknownst to us, STIHL has been constructing our summers all along - since childhood, in fact.
